Big Buster Sign Stand

Tested and certified to meet the crashworthy requirements of [NCHRP-350](#)

with Roll-up Signs, Safe Sign-350 Signs at any height,
 and with .080 Aluminum or Plywood signs at 5' bottom height

60000 Series

The Big Buster sign stand has a steel base and two springs so it can withstand heavy winds as well as severe wind gusts and air currents created by passing trucks. The legs and telescoping mast are made of lightweight aluminum to reduce carrying weight.

Big Buster is designed to hold wood or .080 aluminum signs 5 feet off the ground. It can also be used to hold a roll-up sign 7 feet off the ground.

Big Buster comes with the same Step-n-Drop leg release system found on the Econo Buster, Little Buster and TrafFix Stands. A two position leg adjustment allows all four legs to be individually adjusted for uneven terrain. A built-in bracket holds up to three flags with wooden or plastic dowels.
